

It's 4:59 pm...

How far are you
from the bank?

Introducing a way...

You can bring one of our teller
windows into your business...

...Commercial Capture Xpress

With our electronic deposit solution, we're as close as your computer. This innovative service is an extremely convenient and secure way to eliminate the labor-intensive, error-prone, risky process required to make bank deposits. Simply scanning your checks converts them into electronic transactions that are immediately deposited. It's like bringing one of our teller windows to your business! And although we'd enjoy seeing you, eliminating daily drives to our bank to make deposits means your business will be a little "greener." So let your customers keep paying with those familiar checks and let us provide you with a remote deposit solution that will save you time and money.

Just imagine...

- No more deposit slips
- No more daily drives to the bank
- Faster deposit credit
- Discover bad checks much quicker
- Improve security
- Extend daily deposit deadlines

About Commercial Capture Xpress

Commercial Capture Xpress, also referred to as CCX, is a web based solution for you to make daily deposits at your convenience. Using a PC and a scanner at your business, you can image capture your deposits without making the end of day delivery of deposits to the bank.

...Commercial Capture Xpress

How does it work?

After linking onto the BankFirst CCX website, you will start the web-based application and process the checks for deposit in the scanner. The operator starts the capture process, and the checks are scanned and read. The scanner has a front and back image camera and MICR reader. The captured data passes through a courtesy amount and legal amount recognition (CAR/LAR) engine. The operator will only key the items the CAR/LAR engine did not read (Our read rate averages around 90%). Once the deposit is balanced and approved, an electronic deposit slip is created, and the electronic deposit is transmitted to BankFirst. You will receive same day credit for deposits approved before the 4:00 PM CST cut-off time; Deposits approved after this time will be credited the next business day. The images of the items captured are saved in a dedicated archive that can be accessed through a web based application.

What do I need?

- Windows XP or Vista PC
- Internet Explorer 6 or Higher
- High speed internet connection (minimum 128K)
- Adobe Reader (Free download)
- Java Plug-In (Free download)
- Compatible check scanner

How much will this cost?

We have developed a competitive pricing model designed to fit the budget of any business regardless of size. Pricing is tiered based on the number of items deposited each month. Pricing begins at \$50.00 per month. BankFirst will provide a single-feed scanner at no cost.

What are the advantages?

- Eliminate the cost and inconvenience of making daily deposits at the bank.
- 4:00 PM CST cut-off time.
- Enable you to define and input additional information that is tailored to your business such as invoice number, customer number, apartment number, vendor number, etc. and download to your account receivable or other in-house business application.
- Dual controls to separate scanning/keying function vs. deposit approval authorization.
- Duplicate item detection to minimize the possibility of double entry of items.
- Improve cash flow with later deadlines for completing deposits.
- Extensive reporting capabilities provide you with consolidated reporting for all your locations - reduced administration fees.
